

Do You Want To Become Physically Active?

Weill Cornell Medicine's Division of Geriatrics and Palliative Medicine is conducting a study to test the effect of an innovative system designed to **promote greater physical activity, well-being and social connectedness among older adults.**

- The study lasts *24 weeks (6 months)* and requires *3 interviews*.
- Financial compensation will be provided.

Eligibility:

- **60 years or older**
- **Speak and read English or Spanish**
- **Able to engage in physical activity**
